The facilities provide a combination of housing, supportive services, personalized assistance and health care designed to respond to individual needs.

Contractual Lease Rent: Rental revenue as defined by the lease agreement between us and the operator for the lease year.

EBITDA: Earnings before interest, taxes, depreciation and amortization.

GAAP Lease Yield: GAAP rent divided by the purchase price.

GAAP Rent: Total rent we will receive as a fixed amount over the life of the lease and recognized evenly over that life. GAAP rent is commonly referred to as straight-line rental income.

Glossary

Same Property Portfolio (“SPP”): Same property statistics allow management to evaluate the performance of LTC’s leased property portfolio under a consistent population, which eliminates the changes in the composition of our portfolio of properties. We identify our same property portfolio as stabilized properties that are, and remained, in operations for the duration of the quarter-over quarter comparison periods presented. Accordingly, it takes a stabilized property a minimum of 12 months in operations to be included in our same property portfolio.

Schools: An institution for educating students which include private and charter schools. Private schools are not administered by local, state or national governments; therefore, funded in whole or part by student tuition rather than government funded. Charter schools provide an alternative to the traditional public school. Charter schools are generally autonomous entities authorized by the state or locality to conduct operations independent from the surrounding public school district. Laws vary by state, but generally charters are granted by state boards of education either directly or in conjunction with local school districts or public universities. Operators are granted charters to establish and operate schools based on the goals and objectives set forth in the charter. Upon receipt of a charter, schools receive an annuity from the state for each student enrolled.

Skilled Nursing Properties (“SNF”): Senior housing properties providing restorative, rehabilitative and nursing care for people not requiring the more extensive and sophisticated treatment available at acute care hospitals. Many SNFs provide ancillary services that include occupational, speech, physical, respiratory and IV therapies, as well as sub-acute care services which are paid either by the patient, the patient’s family, private health insurance, or through the federal Medicare or state Medicaid programs.

Stabilized: Newly acquired operating assets are generally considered stabilized at the earlier of lease-up (typically when occupancy reaches 80% at a SNF or 90% at an ALF) or 12 months from the acquisition date. Newly completed developments, including redevelopments, are considered stabilized at the earlier of lease-up or 24 months from the date the property is placed in service.

Under Development Properties (“UDP”): Development projects to construct senior living properties.
